Re: Notice of Ex Parte Presentation: CG Docket Nos. 10-51 and 03-123

Dear Ms. Dortch,

On December 20, 2018, Greg Hlibok, Chief Legal Officer of CSDVRS, LLC (“ZVRS”) (via video conference); Zarko Roganovic (by telephone) of Purple Communications, Inc. (“Purple”) and James Hamlin (by telephone), consultant to Purple; met with Robert Aldrich, Legal Advisor, Consumer and Government Affairs Bureau and Robert McConnell, Telecommunications Accessibility Specialist, Disability Rights Office. ZVRS and Purple reiterated the concerns ZVRS, Purple, Convo Communications, LLC, and Sorenson Communications LLC, (“Joint Providers”) raised in several of their recent ex parte filings regarding the VRS Access Technology Reference Platform (“VATRP”) and associated technical specifications (“RUE Profile”) where the current plan for its development go beyond the Commission’s original scope outlined in the 2013 VRS Reform Order. ZVRS and Purple explained the practical challenges of meeting the RUE Profile specifications where implementation of the RUE Profile as currently drafted is no longer needed to accomplish video interoperability.

Respectfully submitted,

/s/

Gregory Hlibok
